

DURASKIRT™ RESISTS TERMITES

MH SERVICE & SUPPLY, LLC

115 Lind Street

Mount Vernon, WA 98273

Dear valued DURASKIRT™ customers,

It is well known concrete and masonry products are some of the best products available for termite resistance. Additionally, the reason for their resistance is the absence of nutrients. Moreover, DURASKIRT™ skirting placed on either a gravel pad or concrete base is a great combination to resist attracting termites.

For further strategies for resisting termites please read the following article from the National Concrete Masonry Association titled "Strategies for Termite Resistance." <https://ncma.org/resource/strategies-for-termite-resistance/>
