

The Concrete Technology Is Propably The Biggest Reason You Should Consider Using DURASKIRT™ & SDG™ Products Most Products Today Use Centuries Old Formulas. Yes, They're Proven, However Today We have Found We Can Improve Concretes' Longevity To More Than 100+ Years. So Why Not Use That Technology If It Is Affordable?

**SDG™ Is Our ICF & RIGID Insulation Protecting Product Now Sold Nationwide**

- Clean Look
- Hidden-Vent
- Real Concrete

# PROVEN

DURASKIRT™ has proven itself for more than two decades. The reasons we began are still relevant today. People need a well-built long-lasting defense barrier against weather, rodents and horticulture beds, while contractors desire quick and accurate all weather installation.

Meets Federal Permanent Foundation Code For VA, FHA and all other loan requirements.  
MEETS 2021 International Wildland-Urban Interface Code (IWUIC)

## The Air Space Solution

We commonly find, when replacing other skirting types, that the home is rotting at the contact point of the skirting. After investigating we found that moisture is being trapped. Trapped moisture is always detrimental.

**The Solution:** DURASKIRT™ is designed to leave an air-space between the top of the panel and bottom of the home. This feature prevents rot. This is very important for the longevity of your manufactured home.

# Clean Look

Many people purchasing a manufactured home desire their home to look site-built.

DURASKIRT™ gives you the popular clean look of a high-end home. Your friends will never know you live in a manufactured home.

DURASKIRT™ eliminates the unsightly foundation vents by utilizing the "Hidden-Vent". This is the most seamless look on the market today!

## HIDDEN-VENT

- Continuous Air-Flow (No Dead Air Between Vents).
- Unsurpassed Rodent Guard and Deters Large Animals.
- No Vent Wells Needed.
- Prevents Lawn Sprinklers From Soaking Crawlspace Through Vents.

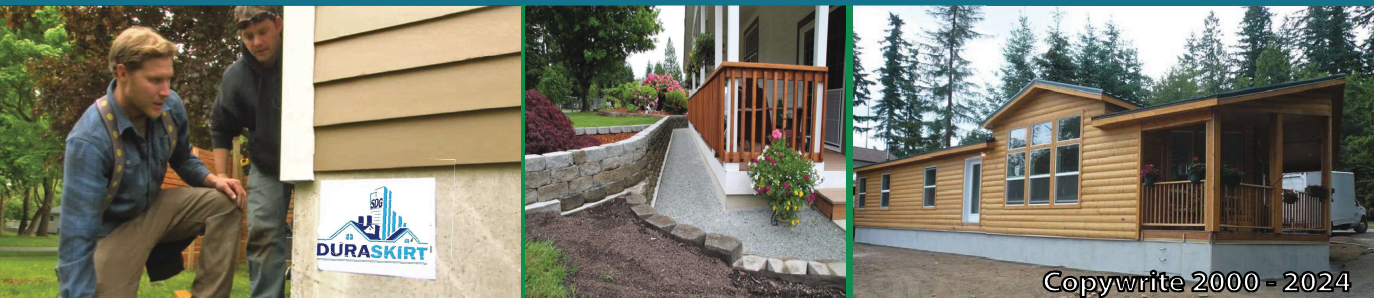

## DURASKIRT™ & SDG™ Real Concrete

A Proprietary High-Strength Cutting Edge Concrete Technology.  
This Allows Much Higher Strengths.  
Also Extending Durable Life More Than 60+ Years.  
The Average 40+ Years Most Concrete Is Expected To Resist Surface Breakdown.  
That's More Than 100+ Years of Expected Surface Durability.

No Other Skirting Product Comes Close.

The only skirting brand engineered for back-filling. Many states require skirting to be engineered for back-fill support. In these states block skirting must be filled & reinforced. This makes DURASKIRT™ the more affordable concrete skirting solution.

## Featured On "Tiny House Nation" Because of It's Popular Site-Built Appearance
